---

After installing, you can register KolXPD extensions to explorer - then you can open files by double-click

- run KolXPD and select *Menu > File > Register file extention associations*
- in Vista or Windows 7 it may be necessary to run KolXPD as Administrator for this operation

Now, you can open files by:

- double-click or enter in explorer
- drag-and-drop them onto KolXPD windows
- drag-and-drop them onto KolXPD icon
- open dialog of KolXPD
- recently opened files by down-arrow next to open button
